Focused revision • Year 3

Maya planted three sunflower seeds in a sunny corner. She watered them every morning. After one week, two green shoots appeared, but the third pot stayed bare.

1. Where did Maya plant the seeds?

2. How often did she water them?

3. How many shoots appeared?

4. Why might the third pot still be bare?

Grown-up answer checks sunny corner; every morning; two; sensible reason

Name: _____
